DETAILED ACTION

1. Applicants' arguments in Paper No. 14, filed July 07, 2003, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

LACK OF UTILITY UNDER 35 U.S.C. § 101

2. The pending claims have been reviewed in light of the Utility Examination Guidelines and Guidelines for Examination of Patent Applications under 35 U.S.C. 112, first paragraph, "Written Description" Requirement, Federal Register, Vol. 66, No. 4, pages 1092-1111, Friday, January 5, 2001.
3. The examiner is using the following definitions in evaluating the claims for utility.

"Specific" - A utility that is *specific* to the subject matter claimed. This contrasts with a *general* utility that would be applicable to the broad class of the invention.

"Substantial" - A utility that defines a "real world" use. Utilities that require or constitute carrying out further research to identify or reasonably confirm a "real world" context of use are not substantial utilities.

"Credible" - Credibility is assessed from the perspective of one of ordinary skill in the art in view of the disclosure and any other evidence of record that is probative of the applicant's assertions. That is, the assertion is an inherently unbelievable undertaking or involves implausible scientific principles.

"Well-established" - a specific, substantial, and credible utility which is well known, immediately apparent, or implied by the specification's disclosure of the properties of a material, alone or taken with the knowledge of one skilled in the art.

35 U.S.C. § 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title".

4. Claims 12 and 13 are rejected under 35 U.S.C. § 101 because the claimed invention lacks patentable utility due to its not being supported by a specific, substantial, and credible utility or, in the alternative, a well-established utility.
5. This rejection is maintained with respect to claims 12 and 13, as recited in the previous office action Paper No. 12, mailed February 06, 2003.
6. Applicants argue via pointed to support (Table 2, page 138, clone identifier R0683G3, and page 141, lines 19-24) that the disclosure of the polynucleotide SEQ ID NO. 1788 encoding polypeptide SEQ ID No. 1789 in the instant specification meets the utility requirement under 35 U.S.C. § 101. Applicants' argument and pointed to support have been fully considered and found to be unpersuasive due to the supporting data is not directed to the actual sequence of SEQ ID NO. 1788, but to a sequence that is similar to SEQ ID NO. 1788.
7. It is acknowledged that Table 2 discloses clone R0683G3 is at least two fold over-expressed in colon tumor cells as compared to a panel of normal tissues by microarray analysis. However, Applicants disclose that R0683G3 is similar to the claimed invention, SEQ ID NO. 1788, resulted from a search against the GenBank nucleic acid database (Example 3, lines 5-13). Therefore, the disclosure of a sequence having expression at least two fold over-expressed in colon tumor cells as compared to a panel of normal tissues by microarray analysis only supports the clone ID R0683G3 but not the actual claimed invention as directed to the sequence of SEQ ID NO. 1788.

CLAIM REJECTIONS - 35 U.S.C. § 112, FIRST PARAGRAPH

8. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

LACK OF ENABLEMENT

9. Claims 12 and 13 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention.

10. This rejection is maintained with respect to claims 12 and 13, as recited in the previous office action Paper No. 12, mailed February 06, 2003.

11. Since the claimed invention is not supported by a specific, substantial, and credible utility or a well-established utility for the reasons set forth above (refer to 35 U.S.C. § 101 rejection), one skilled in the art would not know how to use the claimed invention.

CONCLUSION

12. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

13. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to

Art Unit: 1631

37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
